this breakthrough study examines how business decisions explain successful and unsuccessful performance real world and academic research is evaluated including interviews and cases studies to create a model of how decisions and performance are connected for businesses of all sizes recommendations are made to optimize decision making and projections about the future of decision making and performance are provided

business decision making is not just about sharpening the manager's tools and techniques in defining evaluating and making decisions it is also about stretching the mind to think better that means being able to tap into the brain's patterns of thought sequencing of ideas and creation of insights that means being able to see both the big picture by zooming out and the small picture by zooming in that means being able to ferret out what is relevant important urgent doable and big enough to matter that means being able to imagine many different ways of solving problems finding opportunities and crafting strategies that means being able to diverge into countless possibilities but converge into one powerful solution or direction that means being able to program a series of action steps that would convert ideas into reality

originally published in 1981 risk is a problem which all business decision makers have to cope with the problem is not insurmountable however as there now exist well established techniques for minimising risk and for calculating which of various available options is the optimal one to pursue this book outlines and discusses these techniques and the theories behind them unlike many economic theories which only rarely have any practical applications the techniques put forward in this book can be used by real businessmen to solve real business problems the book concentrates on decision making in two main areas the allocation of a firm's resources and the selection of new investments and the techniques and theories discussed fall into three broad groups linear programming decision theory and capital market theory intended as an advanced undergraduate textbook for students taking business economics or managerial economics courses this valuable book will interest specialists and students involved in management studies microeconomics strategic planning operational research accounting and mba programmes

explains who is involved in business decision making how decisions have been made what the characteristics and strategies of chinese decision making are and why decision making has followed certain patterns in china includes discussion questions after each chapter of interest to people thinking of doing business in east asia consultants government officials and researchers paper edition unseen 24 95 annotation copyrighted by book news inc portland or

this book will help you deal with the hundreds of decisions you are faced with every day it will show you how the mind processes information biological physiological and psychological factors influence thinking to better prepare yourself to address probable influences on your decisions to unleash the creative potential in your mind this book distills what behavioral science has discovered related to how people especially those in business make decisions making better business decisions will enable decision makers to recognize and focus on the truly important decisions that require critical thinking analyze options

more clearly and creatively reduce decisional time and effort improve judgement quality awareness and application of the material contained within will enable us not only to improve our own decisions but will also provide the means for us to understand how and why others decide as they do applying rational decisional techniques or intuition can most likely solve our everyday routine repetitive and minor problems as decisions become more important and problems become more difficult the energy required by critical thinking skills and creative problem solving can improve the quality of our thought processes and increase the likelihood of uncovering optimal solutions

business runs on decisions business relies on estimates plans and projections and we all know how accurate they tend to be careers are made careers are broken based on perceived accuracy in estimation and planning but what if the successes and failures of these projects were not based on the prowess of those making the plans what if successes and failures were instead the result of a more complex set of events what if our own cognitive biases our own brains were creating our inaccuracies our poor assumptions and our unreasonable expectations why plans fail directly addresses our ability to plan to forecast and to make decisions written by jim benson author of the shingo research award winning personal kanban urban planner software developer and business owner who has planned and built everything from small software projects to houses to urban freeway systems why plans fail is told by someone with much skin in the estimation and planning game this short work is the first in the modus cooperandi mememachine series which looks specifically at underlying issues that directly impact the success of teams companies and individuals the mememachine series is meant to start conversations and advance discussion

specifics of decision making in modern business systems focuses on the regularities and tendencies that are peculiar for the modern russian practice of decision making in business systems as well as the authors solutions for its optimization in view of new challenges and possibilities
